The Bridge Integrated Learning Space

The purpose of the PE & Sports Grant is to improve sports provision in primary schools. In 2020-21 The Bridge Integrated Learning Space received £1020.

This is a decrease of £980 from last year. Our grant has continued to contribute towards enhancing our access to community by supporting us to maintain our minibus and car which are critical for getting students out to local parks and events. Up until March 2020 lockdown, we had increased pupil access to the community for sports and other cultural events by joining the Islington 11 / 11 initiative which aims to give all young people access to cultural events in their communities. We have also been working closely with the Healthy Eating team in the borough reviewing the ways we can support initiatives to maximise good health in our young people and wider community. We will continue to have a targeted focus on these areas for the coming year as physical and emotional wellbeing are a core priority of our work at the ILS.
