Seesaw is a digital platform where teachers of all grade levels and content areas can create learning tasks and assignments for students. The assignments can incorporate videos, photos, text, images, files, or drawings.

Throughout the school year, Seesaw builds an organized, digital portfolio of each student's learning, accessible by teacher, student and parent.

With Seesaw, home-to-school communication is centered on students and their learning. From video reflections to hands-on group projects, students of all ages are empowered to add work to their journal where family members can see it and leave comments of encouragement.

Messages

Seesaw Messages allows for ongoing communication with students and families that builds a positive environment to support student learning, with trust and safety in mind.
