## School News

Issue 36 - 14/05/2021

Last week we had a very special day in school. We all celebrated NSPCC Number's Day! It was a whole day of fun maths.

We all had a fabric bag and t-shirt to decorate. The only instruction was that it had to be based on number.

Here is a selection from the students.

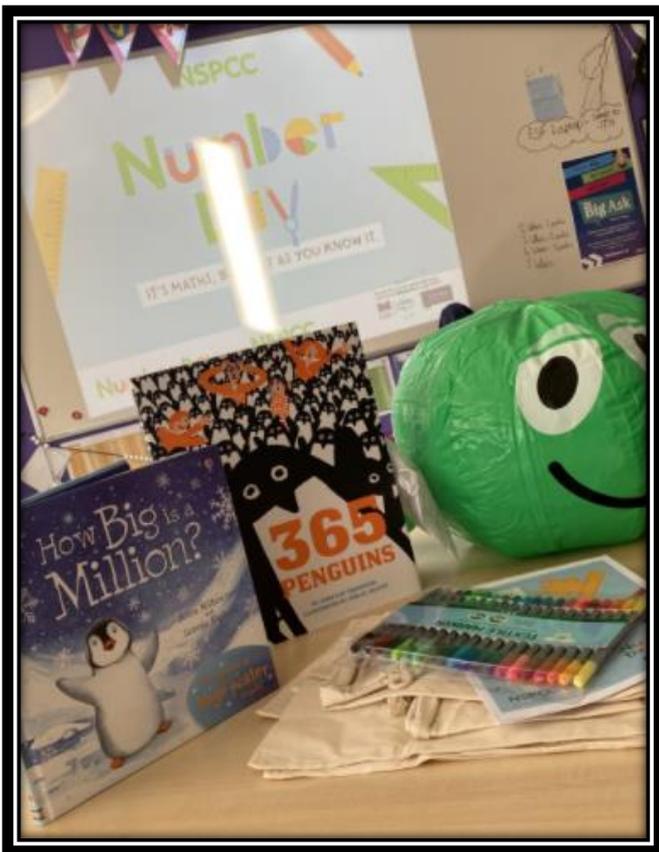

Clocks, favourite numbers, lucky numbers and unlucky numbers all made an appearance.

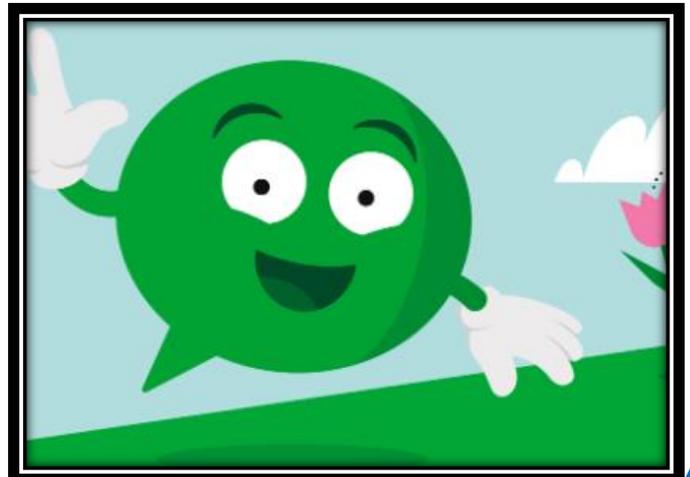

Number 13..... unlucky for some?  
Not for the student in Polar  
Bears!

Number 2.... Number 3.... So many lucky numbers!

Buddy is the mascot of the NSPCC Number's Day Challenge. We all need a Buddy Challenge as part of the day.

Each class also looked at a book. Polar Bears studied 'How big is a Million' and '365 Penguins'. Using stories can help us to visualise maths and make it more concrete and hands on.

Tigers have been having great fun in Motional time. Miss Miguel bought them a new game! It was quite complicated to learn how to play but between us we managed to figure it out. Tigers cooperated with each other and helped everyone to make sure we all knew how to play.

Great work!

Dolphins make hieroglyphs on stones in Forest Schools.  
Can you guess what it represents?

They also set up a nature shop. They gathered things in the forest area and front garden to sell in the shop.

Elephants found a woodlouse hiding on a stick. Can you spot it?

This student gathered resources to make art with. You can make a collage, use the leaves to paint with or even the green from the leaves to paint with!
